REPORT ON GUEST LECTURE

TOPIC SYNOPSIS

AGENDA

Competitive Examinations:

This guest lecture aims to empower participants with the knowledge and strategies necessary to excel in competitive examinations. Participants will benefit from the expertise of our guest speaker, gaining valuable insights into effective study techniques, time management, and maintaining a positive mindset throughout their exam preparation journey.

1. Grasp the view of Competitive Examinations

- * Take a look at various ranges of Competitive Examinations and their importance.
- * Explain similarities and dissimilarities among various competitive Examinations.

2. Make use of Technology and Online Resources

- * Search the role of online resources and online platforms.
- * Come up with advice for reputable online resources and tools

3. Preparation of Subject study

- * Customize guidance to specific subjects commonly tested in competitive exams.
- * Suggest insights into resource selection, study materials, and subject specific preparation techniques.

4. Fruitful preparation techniques.

- * Facilitate practical tips for effective study planning and time management.
- * Analysis strategies for retaining information, active learning, and overcoming destruction.

5. Mock test and Practice

- * Discuss the role of mock test and Practice papers in examination preparation.
- * Provide advice on analyzing and learning from mistakes made during practice.

GUEST LECTURE

We the Department of Zoology organized a guest lecture for B.Sc students by the resource person **Dr.B.Krishna**, Lecturer in Zoology, **Govt. Degree College**, and Marripalem. Sir delivered a lecture on empowers participants with the knowledge and strategies necessary to excel in learning the subject, opportunities and clarifies the doubts of students. Sixty two (62) students are attended to Guest Lecture from 1st B.Sc CBZ & BZH. By this guest lecture students develop their knowledge and learning skills.

REPORT ON GUEST LECTURE

TOPIC SYNOPSIS

AGENDA:

INTRODUCTION: The most common shelled protozoan's are foraminiferans belongs to the order foraminiferida (L., forare, pores + ferre, to bear). Almost all the members of the order are marine. Over with small pores, through which extend long and fine pseudopodia. Many foraminiferans exhibit the phenomenon of dimorphism (individual of a single species occurs in two distinct forms). *Elphidium crispum* (= *Polystomella*) is a typical example of the dimorphic forms.

ELPHIDIUM CRISPUM (POLYSTOMELLA): Unicellular animal Hard translucent shell – calcium carbonate 90%, MgSo₄, Si -10% Shell is Polythalamus or multilocular - several chambers.

HABIT AND HABITAT: *Elphidium* is a marine form, found abundantly on the bottom of the ocean. It is found creeping about on sea-weeds to a depth of 300 fathoms (one fathom = 1.8 meters). It also occurs in brackish waters.

STRUCTURE OF ELPHIDIUM

Dimorphism: Microspheric form: Megalospheric form:

It occurs in two distinct forms the microspheric and megalospheric. Microspheric form: Proloculum is small in size. Many nuclei are present in the cytoplasm. It exhibits asexual reproduction. Megalospheric form: Proloculum is big in size. A single large nucleus is present in one of the chambers. It exhibits sexual reproduction.

Cytoplasm: All the chambers of living *E. Crispum* filled with inner cytoplasm.

LOCOMOTION: *Elphidium* creeps slowly on the sea bottom with the help of reticulopodia.

NUTRITION: Nutrition is holozoic. The food consists mostly of diatoms and algae; it also captures other Protozoa and micro crustaceans.

REPRODUCTION AND LIFE CYCLE

***Elphidium* exhibits alternation of generation in its life cycle.**

Lister (1895) observed the development of the megalospheric form (sexual form) from the microspheric form (asexual form) by asexual reproduction. Thus megalospheric forms alternate with microspheric forms. There is always an alternation of asexual (microspheric) and sexual (megalospheric) generations in *Elphidium*. According to Jepps, the entire cycle of sexual and asexual phase is completed in about two years

Elphidium – Asexual Reproduction

The microspheric form reproduces asexually by fission to produce a number of amoebulae. Nuclei creep out of the shell and a small amount of cytoplasm collects around each nucleus. As a result, a large number of amoeboid cells (amoebulae) or agamates are formed. Each amoebula secretes the proloculum, forms rhizopodia, then it grows and forms other chambers of the shell to become a megalospheric form.

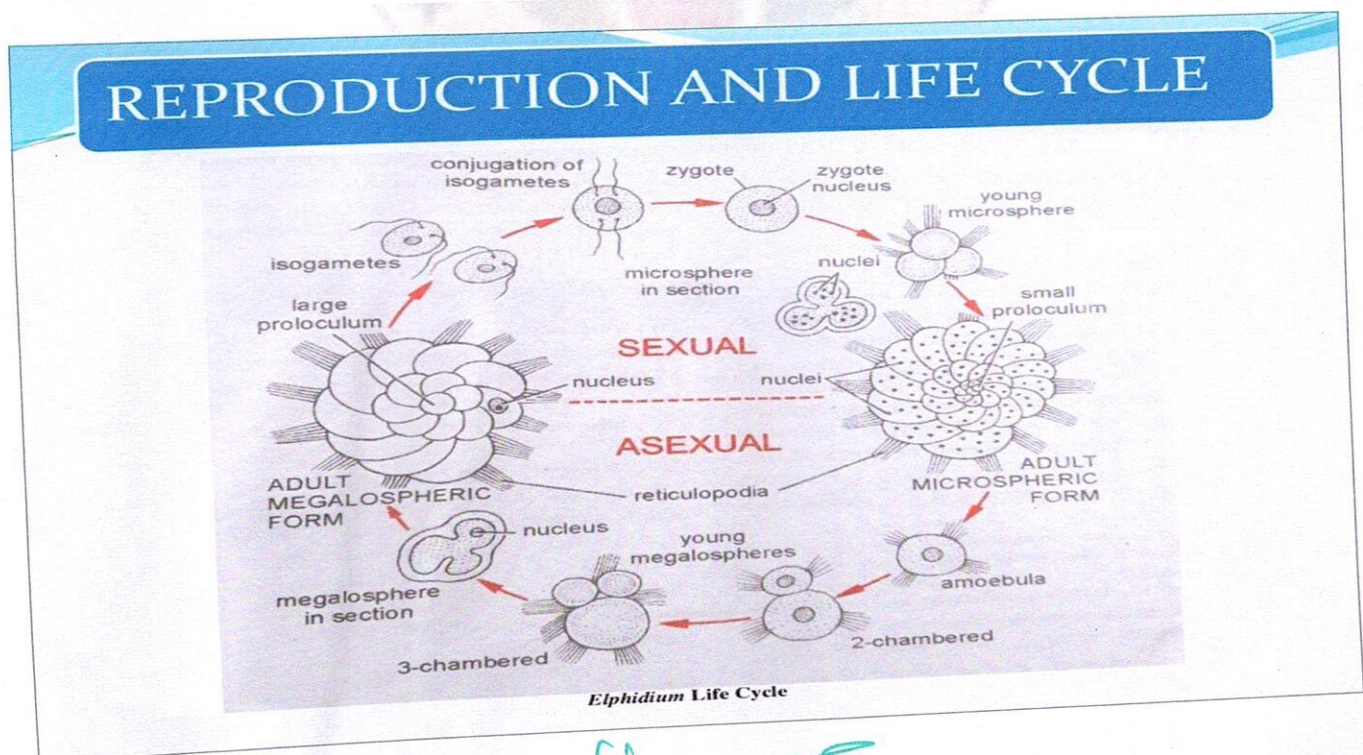

Elphidium – Sexual Reproduction

The megalospheric form reproduces sexually by syngamy or conjugation. The nucleus first breaks up into many small nuclei and the cytoplasm collects around each of these nuclei. The nuclei divide twice giving rise to a large number of tiny cells. The cells develop flagella and come out of the shell.

Life cycle: The life cycle of Elphidium, clearly exhibits the phenomenon of alternation of asexual microspheric generation with sexual megalospheric generation.

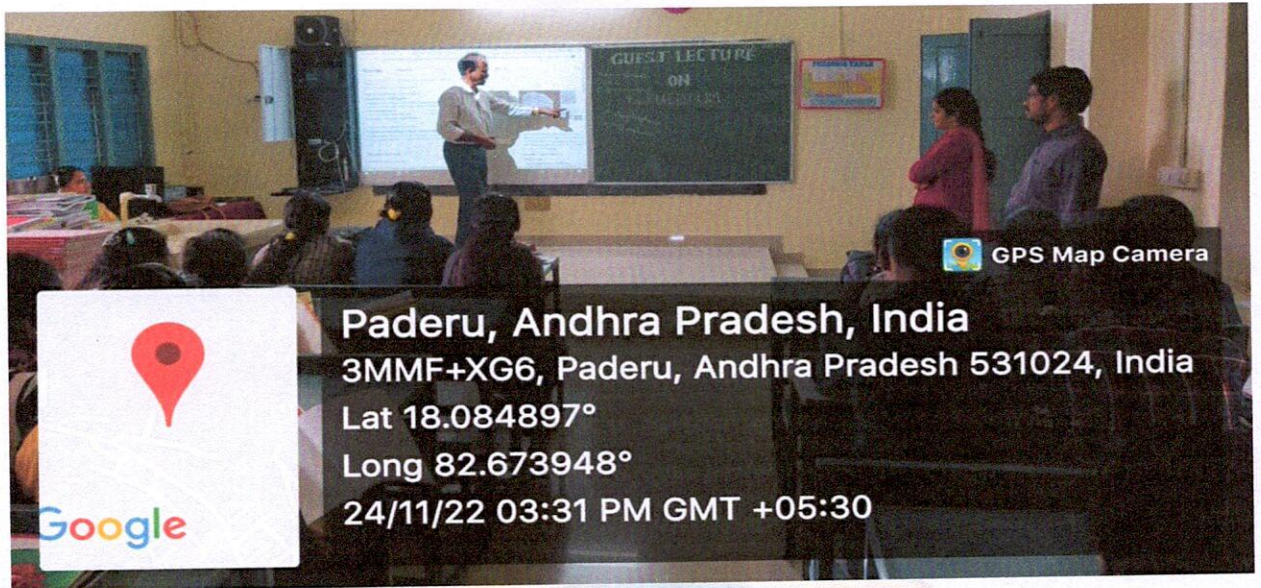

When the elphidium die, their shells fall on the ocean floor like a steady rain and contribute to the formation of bottom sediments, called 'ooze'.

Calcareous ooze is the general term for layers of muddy, calcium carbonate (CaCO_3) bearing soft rock sediment on the seafloor. Investigating calcareous ooze of modern (i.e., Holocene) and ancient (e.g., Pleistocene) oceans means to elucidate the role that oceanic processes play in global climate change during various geologic time intervals and at different levels of precision.

TOPIC SYNOPSIS

INTRODUCTION:

Dr. V. Ramana Lecturer in Zoology was explaining the significance of CSIR-NET and APSET exams in the context of research and teaching positions in India and Abroad.

He was explaining the purpose and objectives of CSIR-NET and APSET. Highlights the institutional responsibilities for conducting these exams and their role in the academic community.

Examination Pattern and Syllabus:

Provide an overview of the exam pattern, including the number of papers, types of questions, and marking scheme. Discuss the syllabus for CSIR-NET and APSET, emphasizing the importance of thorough preparation in the chosen subject.

Subject cover:

Enumerate the various subjects for which CSIR-NET is conducted, focusing on the diverse range of disciplines in the sciences. Discuss the subjects offered in APSET, which covers a broad spectrum of disciplines in teaching aptitude, research aptitude, and mental ability. He was recommending reference books, study materials, and online resources that candidates can use to prepare for the exams.

Preparation Strategies:

Offer tips and strategies for effective exam preparation, including time management, resource utilization, and the importance of practice.

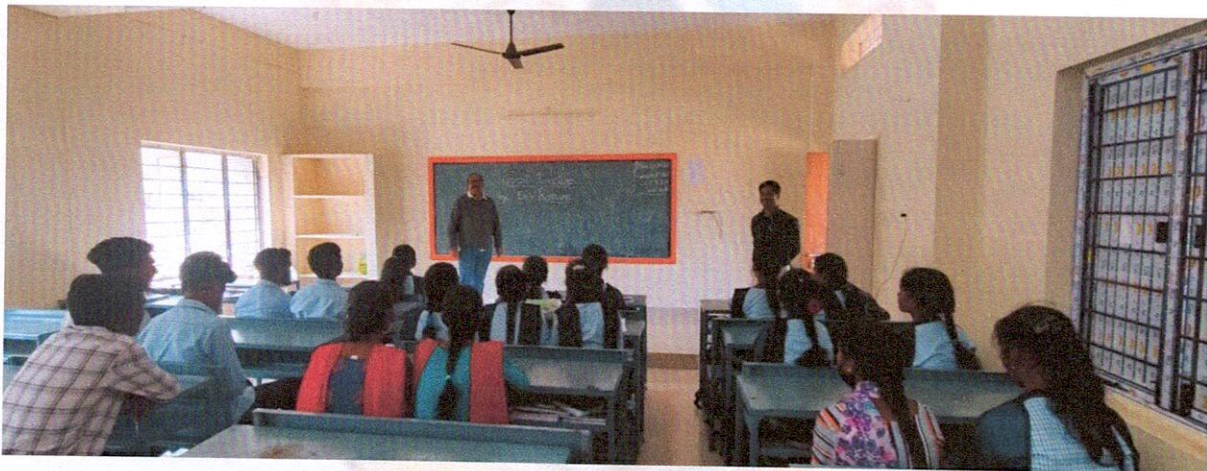

Carrier opportunities: Discuss the career opportunities available to candidates who successfully qualify exam, including research position teaching position and other avenues.

Success stories and testimonials: Share success stories of individuals who have excelled in their careers after clearing the exam.
